Art Unit: 2834

Claims 5-7 are allowed.

Applicants traversal of the restriction requirement is noted. However, contrary to applicants assumption, the search areas for a SAW structure and its method of manufacture are not coincident. In this case they do not ever overlap. Each subclass was searched by viewing every document in the subclasses searched. While this was done "electronically" on a computer, it did not reduce the number of document that needed to be viewed. Thus the restriction requirement is deemed proper and is hereby made final.

Applicant must either cancel non-elected claims 1-4 or take other appropriate action.

Cited of interest are Takahashi (figs. 1 & 7), Takoshima, Shinonaga and Nitsuma (figs. 3 and 9).
